

Protect your business data with Sprint Professional Grade.

With the proliferation of data on mobile devices, business users are concerned about the protection of their most critical information.

Sprint understands the importance of keeping your most crucial data secure, and with Sprint Professional Grade you can worry less about the threats to valuable and sensitive information on mobile devices. Sprint Professional Grade offers management and security features for mobile devices, providing them with enhanced features in Exchange Active Sync, Mobile Device Management and Security, VPN and Encryption.

Business benefits

- > Connect to the Internet, email, use applications and perform business functions securely and remotely
- > Access company information and feel confident that the data is protected and safe
- > Improve business processes, workflow and communications with co-workers, administrators and clients

Continuing to make steps in the right direction toward device security, while understanding the everyday needs of business users, Sprint is:

- > Actively addressing concerns to offer enterprise grade devices to business customers

- > Partnering with Original Equipment Manufacturers (OEMs) to address requirements for EAS VPN, MDM and AES 128-256
- > Working with top tier Mobile Device Management partners to pre certify them on Professional Grade devices
- > Providing a more manageable customer experience without a pervasive third-party "feel" to operating devices
- > Expanding the scope of Sprint Professional Grade in 2012 to incorporate Mobile Broadband (MBB) and Professional Grade hardware specifications for devices

By continuing to make steps in the right direction toward device security and understanding the everyday needs of business users, Sprint is actively addressing concerns to offer enterprise grade devices to business customers. The solutions provides a cohesive customer experience to operating devices, making you feel comfortable and confident about the technology on your device.
